ADVANCING *IN VITRO* GASTROINTESTINAL RESEARCH

At this 7th TIM User Group Meeting, we will evaluate two years of experience using the latest TIM technology. Triskelion, her partners and TIM Users will share updates on the technology, methodology and recent applications of the TIM systems in pharma and food.

As always, the TIM User Group Meeting will provide an excellent opportunity to network with other TIM Users and with colleagues from academia, as well as leading pharmaceutical and food companies.
